regards the branches with two-digit share in the structure of industrial production, growth of 31% was registered at production of food products, while growth of 3.7% was recorded at production of clothing. High growth was generated at the following branches: production of electrical equipment – 42.5%, production of fabricated metal products except machines and equipment – 27.1%, production of metals – 16.3% and production of paper and paper products – 10.4%. Production of food products (4 p.p.) contributed the most to the annual change of industrial production in July 2014, while production of basic pharmaceutical products and preparations had the highest negative contribution (-0.9 p.p.).

Industrial production surged by 5.9% in July 2014 compared to June 2014. Sector analysis points out that electricity, steam and airgas, sector conditioning supply processing industry and sector experienced increase of 34.5% and 4.2% respectively, while the mining and quarrying sector experienced a 0.7% decline.

On cumulative basis, in the period January-July 2014, industrial production grew by 4.7%, compared to the same period in 2013. Growth was also registered in the processing industry sector – 10.3%, while electricity, gas, steam and air-conditioning supply sector and mining and quarrying sector experienced a decline of 19.6% and 1.5% respectively.

Data on industrial production by target groups in July 2014, compared to July 2013, showed that there was an increase in the production at the following groups: capital goods – 47.6%, intermediary goods, except energy – 5.5% and consumer non-

durables – 5.2%, while decline was observed at the following groups: consumer durables – 9.2% and energy – 8.8%.

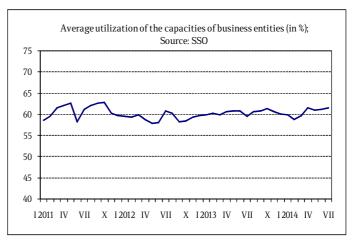

On monthly basis, data on the industrial production by target groups in July 2014 show that there was an increase in the production at the following groups: energy – 26.4%, consumer non-durables – 8.8% and intermediary goods except energy – 5.8%. Drop was seen at the following groups: consumer durables – 20.3% and capital goods – 15.4%.

On cumulative basis, in the period January–July 2014, compared to the same period in 2013, growth was registered at the following groups: capital goods – 42.5%, intermediary goods, except energy – 8.2%, consumer non-durables – 3.8% and consumer durables – 0.3%. Drop was registered at the energy group – 15.1%.

Business Tendencies in the Processing Industry

According to the assessments, current economic trends of business entities in July 2014 were more favourable compared to the previous month, and they remained the same in relation to June 2013.

Assessment of delivery-toproduction was more favourable compared to both the previous month and July 2013. In July 2014, assessment of the production volume in the past three months was more favourable compared to June 2014, while it was less favourable compared to July 2013. In July 2014, expectations for the production volume in

the next three months are more favourable compared to both the previous month and July 2013.

As regards the number of employees, expectations in July 2014 for the next three months are more favourable compared to the previous month, while compared to July 2013, they are less favourable.

Average utilization of the capacities in July 2014 accounted for 61.6%, being an increase compared to the previous month, when it accounted for 61.2%. Compared to July 2013, utilization of the capacities was lower by 1.2 p.p..

In July 2014, stocks of raw materials and intermediate goods, as well as on-going procurement of raw materials and intermediate goods, were below and around the average. Assessment of the current stock of ready-made products was more favourable compared to both the previous month and July 2013. According to the assessment of managers, in the next 3-month period, both average purchase prices of inputs and selling prices of ready-made products are expected to increase.

According to the assessment, following factors limited the most the production volume in June 2014: insufficient foreign demand – 22.2%, insufficient domestic demand – 18.5%, shortage of skilled labour – 15.4%, uncertainty of the economic environment – 9.2% and financial problems – 8.9%.

Less business entities indicated the following as a limiting factor in July 2014, compared to June 2014: shortage of raw materials, insufficient domestic demand, insufficient foreign demand and unclear economic laws, while more of the business entities indicated the following: lack of equipment, shortage of skilled labour, competitive export, financial problems and uncertainty of the economic environment.

Number of Industrial Workers

Number of workers in the industry in July 2014 compared to July 2013 increased by 6.3%. Sector analysis points out to increase in the number of workers in the processing industry sector by 7.8% while the number of workers in the mining and quarrying sector, as well as the electricity, gas, steam and air-conditioning supply sector decreased by 3% and 1.9% respectively.

Data on the number of workers in the industry by target groups in July 2014, compared to July 2013, showed increase in the number of workers at the following groups: capital goods – 96.9%, consumer durables – 6.3% and intermediary goods, except energy – 4.8%, while number of workers in the energy group dropped by 5.1%. Number of workers in the consumer non-durables group remained unchanged.

Index on the number of workers in the industry in the period January – July 2014, compared to the period January - July 2013, accounted for 6.9%.

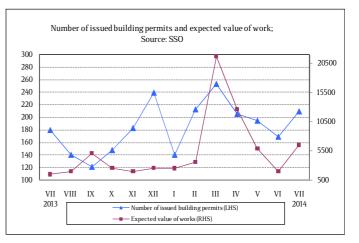

Number of Issued Building Permits and Envisaged Value of Facilities

In July 2014, 209 building permits were issued, being an increase of 16.8% compared to the same month last year. Total number of issued building permits, compared to June 2014, when 169 permits were issued, increased by 23.7%.

Envisaged value of the facilities, according to the issued building permits in July, amounted to Denar 6,453 million, being by 4.4 times more compared to July 2013. In relation to June 2014, value of the facilities grew by 3.3 times.

Analyzed by types of facilities, out of the total number of issued building permits, 146 (or 69.9%) were intended for buildings, 24 (or 11.4%) for civil engineering structures and 39 (or 18.7%) for reconstruction facilities.

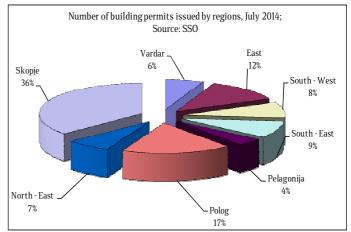

Analyzed by types of investors, out of total 209 issued building permits, natural persons were

investors in 141 facilities (or 67.5%), while business entities were investors in 68 facilities (or 32.5%).

In July 2014, construction of 314 flats was envisaged, with total usable area of 29,573 m². Number of flats envisaged for construction declined by 3.1% compared to the same month in 2011, and it increased by 7.5% compared to June 2014.

Analyzed by regions, in July 2014, most permits were issued in the Skopje region, 76 in

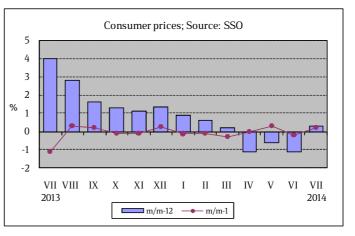

total, 53 permits out of which were issued to natural persons as investors, while 23 permits were issued to business entities as investors. Pelagonija region had least issued permits, 8 permits in total, 7 permits out of which were issued to natural persons as investors, while 1 permit was issued to business entities as investors.

Trade Balance

In the first seven months in 2014, trade deficit narrowed by EUR 48.2 million or 5.3% compared to the same period last year.

If we analyze the balance of export and import of goods by economic purpose, deficit narrowing was a result of combined effect from: narrowing of negative balance in the trade of transport equipment, investment goods without transport equipment and food and beverages, while the widened negative balance in the trade of goods for industrial procurement, fuels and lubricants and consumer goods acted in opposite direction.

Analyzed according to economic groups of countries, in the period January - July 2014, compared to the same period in 2013, export grew at the following groups: EU 28, EFTA, Organization of Petroleum Exporting Counties, North American Free Trade Zone, while drop was recorded at the following groups: Western Balkan Countries, Asia-Pacific Economic Cooperation Organization and Commonwealth of Independent States. Export to the EU surged by 25.2% on annual basis, while as for Western Balkan countries, it declined by 9.2%.

In the first seven months of 2014, foreign trade of the Republic of Macedonia with the European Union (EU 28), in relation to the same period in the previous year, increased by 20.5%, whereby share of trade with the EU in the total foreign trade increased by 3.5 p.p., accounting for 69.7%. Export of goods to the European Union

(EU 28) accounted for 78.0% in the total export of the Republic of Macedonia, while import of goods participated with 64.2%.

In the period January - July 2014, 94.8% of the trade deficit of the country was realized in the trade with Great Britain, Greece, China, Serbia and Turkey, followed by Italy, Romania, the USA, Russia, Slovenia, etc. Surplus was realized in the trade with Germany, Kosovo, Belgium and Bosnia and Herzegovina.

Currency Structure

Observed by currency structure, 78.4% of the trade in the period January - July 2014 was realized in euros and, compared to the period January - July 2013, it surged by 5.0 p.p.. On export and import side, euro accounted for 87.3% and 72.4%, respectively, whereby share of the euro in export was higher by 4.6 p.p., while increase of the share of the euro in import accounted for 5.0 p.p. compared to the period January – July 2013.

METHODOLOGY OF FISCAL TABLE OF THE BUDGET OF THE REPUBLIC OF MACEDONIA

Methodology used when preparing the fiscal tables (showing the projected. i.e. realized deficit or surplus) i.e. showing revenues and expenditures **above the line** and inflows (borrowing. privatisation and concession proceeds) and outflows (repayment of debt principal) **below the line (**whereby "line" means line showing deficit/surplus) is according to the IMF Government Finance Statistics Manual (GFS Manual 1986). However, when preparing the balance sheets of the Budget of the Republic of Macedonia. Inflows are also shown as revenues, i.e. outflows as expenditures. Principle of balancing, i.e. equalizing revenue (including inflows) and expenditure side (including outflows) is applied on the balance sheets during the budget planning process. When shown in the fiscal tables revenues and expenditures are above the line while inflows and outflows below the line. Difference between revenues and expenditures is equal to surplus or deficit. Surplus, i.e. deficit should be equal to the financing below the line but with opposite sign. Thus, if there is a deficit (negative sign) there should be financing (positive sign). Financing is obtained as difference between inflows and outflows and net changes in deposits (being actually residual of the three previously mentioned categories: inflows. outflows and deficit/surplus).

As for fiscal tables, net changes in deposits are shown below the line under inflows (shown with "-" if there is increase in deposits. or with "+" if there is drawing down of deposits
