METHODOLOGY OF FISCAL TABLE OF THE BUDGET OF THE REPUBLIC OF MACEDONIA

Methodology used when preparing the fiscal tables (showing the projected. i.e. realized deficit or surplus) i.e. showing revenues and expenditures **above the line** and inflows (borrowing. privatisation and concession proceeds) and outflows (repayment of debt principal) **below the line** (whereby "line" means line showing deficit/surplus) is according to the IMF Government Finance Statistics Manual (GFS Manual 1986). However, when preparing the balance sheets of the Budget of the Republic of Macedonia. Inflows are also shown as revenues, i.e. outflows as expenditures. Principle of balancing, i.e. equalizing revenue (including inflows) and expenditure side (including outflows) is applied on the balance sheets during the budget planning process. When shown in the fiscal tables revenues and expenditures are above the line while inflows and outflows below the line. Difference between revenues and expenditures is equal to surplus or deficit. Surplus, i.e. deficit should be equal to the financing below the line but with opposite sign. Thus, if there is a deficit (negative sign) there should be financing (positive sign). Financing is obtained as difference between inflows and outflows and net changes in deposits (being actually residual of the three previously mentioned categories: inflows. outflows and deficit/surplus).

As for fiscal tables, net changes in deposits are shown below the line under inflows (shown with "-" if there is increase in deposits. or with "+" if there is drawing down of deposits
