Trade Balance

In the first eleven months in 2014, trade deficit narrowed by 2.0% or EUR 31.9 million compared to the same period last year.

If we analyze the balance of export and import of goods by economic purpose, deficit narrowing was a result of combined effect from: narrowed negative balance in the trade of transport equipment, investment goods without transport equipment and food and beverages, while the widened negative balance in the trade of goods for industrial procurement, fuels and lubricants and consumer goods acted in opposite direction.

Analyzed according to economic groups of countries, in the period January-November 2014, compared to the same period in 2013, export surged at the following groups: EU 28, EFTA, Organization of Petroleum Exporting Counties, North American Free Trade Zone, while drop was recorded at the following groups: Western Balkan Countries, Asia-Pacific Economic Cooperation Organization and Commonwealth of Independent States. Export to the EU surged by 24.4% on annual basis, while as for Western Balkan countries, it declined by 8.7%.

In the first eleven months of 2014, foreign trade of the Republic of Macedonia with the European Union (EU 28), in relation to the same period in the previous year, increased by 18.3%, whereby share of trade with the EU in the total foreign trade increased by 2.6 p.p., accounting for 69.1%. Export of goods to the European Union (EU 28) accounted for 76.9% in the total export of the Republic of Macedonia, while import of goods participated with 63.8%.

In the period January - November 2014, 84.6% of the trade deficit of the country was realized in the trade with Great Britain, Greece, Serbia and China, followed by: Turkey, Italy, Romania, Slovenia, the USA, Austria, Russia and others. Surplus was realized in the trade with Germany, Kosovo, Belgium and Bosnia and Herzegovina.

Currency Structure

Observed by currency structure, 80.0% of the trade in the period January – November 2014 was realized in euros, and compared to the period January – November 2013, it surged by 6.2 percentage points. On export and import side, euro accounted for 87.9% and 74.7%, respectively, whereby share of the euro in export was higher by 4.1 p.p., while share of the euro in import increased by 7.3 p.p. compared to the period January – November 2013.

METHODOLOGY OF FISCAL TABLE OF THE BUDGET OF THE REPUBLIC OF MACEDONIA

Methodology used when preparing the fiscal tables (showing the projected. i.e. realized deficit or surplus) i.e. showing revenues and expenditures **above the line** and inflows (borrowing. privatisation and concession proceeds) and outflows (repayment of debt principal) **below the line** (whereby "line" means line showing deficit/surplus) is according to the IMF Government Finance Statistics Manual (GFS Manual 1986). However, when preparing the balance sheets of the Budget of the Republic of Macedonia. Inflows are also shown as revenues, i.e. outflows as expenditures. Principle of balancing, i.e. equalizing revenue (including inflows) and expenditure side (including outflows) is applied on the balance sheets during the budget planning process. When shown in the fiscal tables revenues and expenditures are above the line while inflows and outflows below the line. Difference between revenues and expenditures is equal to surplus or deficit. Surplus, i.e. deficit should be equal to the financing below the line but with opposite sign. Thus, if there is a deficit (negative sign) there should be financing (positive sign). Financing is obtained as difference between inflows and outflows and net changes in deposits (being actually residual of the three previously mentioned categories: inflows. outflows and deficit/surplus).

As for fiscal tables, net changes in deposits are shown below the line under inflows (shown with "-" if there is increase in deposits. or with "+" if there is drawing down of deposits
