1 EVENTS ON THE FINANCIAL MARKET IN THE PAST PERIOD

1.1 Trends on the primary market for government securities in the Republic of Macedonia

What was characteristic for the government securities market (hereinafter: GS) in the period July - August 2008 is the trend of continuous increase of interest rates on GS in all maturities, which started in early 2008. During July, Ministry of Finance of the Republic of Macedonia adopted a decision to change the volume tender (fixed interest rate) into interest rate tender (multiple interest rates) on treasury bills. Average weighted interest rate on 3-month treasury bills in July was 7.28%, and it increased by 0.11 percentage points, amounting to 7.39% in August. Interest rate on 6-month treasury bills in July was 7.30%¹, and it amounted to 7.76% in August, being an increase by 0.46 percentage points. In August, weighted interest rate on the auctions of 12-month treasury bills amounted to 7.92%. On the auction of the 2-year government bond held in August, coupon interest rate of 8.25% was offered.

Comparative analysis of the trends in the interest rates on government securities at the beginning of 2008 suggests a continuous upward trend. Interest rate on 3-month treasury bills achieved on the auctions in January 2008 was 5.10%, while the same interest rate achieved on the auctions in August 2008 grew by 2.29 percentage points and it was 7.39%. Interest rate on the 6-month treasury bills in January 2008 was 5.37%, while the same interest rate achieved on the auctions in July 2008 grew and was 7.76%. Trend of interest rates is identical in other maturities of GS, i.e. interest rates on 12-month treasury bills and on 2-and 3-year government bonds. In fact, since the beginning of the year, interest rates on 12-month treasury bills, 2-year government bonds and 3-year government bonds increased by 2.24 percentage points, 2.00 percentage points and 1.25 percentage points respectively. Coupon interest rate offered on the auctions of 2-year government bonds in August 2008 was 8.25% while coupon interest rate on the last auction of 2-year government bonds held in February 2008 was 6.25%.

General conclusion is that at auctions of GS, realized in the course of July and August, demand was lower compared to the amount offered. Total amount of GS offered on the auctions in July was Denar 2.05 billion and the demand was Denar 964.22 million, while during August, Denar 1.4 billion was offered and the demand was around Denar 659.73 million.

During the analyzed period, there were positive changes in the ownership structure of undue government securities. In fact, share of banks in undue government securities dropped by 3.87 percentage points, i.e. from 68.48% in June to 64.61% in August, but as a result, the share of other investors grew (pension funds, insurance companies, savings

¹Volume tender - fixed interest rate was applied on the auction of 6-month treasury bills, held in June.

*Ministry of Finance of the Republic of Macedonia
Public Debt Management Department*

houses, etc.). At the same time, share of insurance companies grew by 0.50 percentage points, of pension funds by 0.56 percentage points, of savings houses by 0.12 percentage points, and the biggest increase of share was noted in the category „other“, i.e. it grew by 2.73 percentage points. Share of physical persons in the ownership structure of undue government securities changed insignificantly in the same period, and it was 0.20%.

1.2 Seventh issue of denationalization bonds

Following the adopted amendments to the Law on Issuance of Denationalization Bonds in the Republic of Macedonia (Official Gazette of the Republic of Macedonia, nos. 37/2002 and 89/2008), Government of the Republic of Macedonia, at its fifth session held on 12 August 2008, adopted the Decision on Seventh Issue of Denationalization Bonds.

Total amount of the seventh issue of denationalization bonds is EUR 30,000,000.00. Seventh issue of the denationalization bonds covers all decisions on denationalization which became effective by 31 December 2007, according to which bonds are given as form of compensation.

Denationalization bonds are registered securities, denominated in euros and issued as dematerialized securities. Face value of a denationalization bond is EUR 1, coupon interest is 2% annually and the repayment period for the face value and the interest is 10 years.

Holders of denationalization bond from the seventh issue are sent, at their home address, a notification on the amount of the issued bonds.

Trading with the denationalization bonds from the seventh issue, as from 27 August 2008, is carried out on the Macedonian Stock Exchange AD Skopje with the intermediation of the brokerage companies and the banks - members of the Macedonian Stock Exchange AD Skopje.

The citizens can use the denationalization bonds prior to their maturity for the following: buying shares and stocks in state-owned enterprises; stocks and shares of enterprises reserved for former owners pursuant to the to the Law on Transformation of Socially-Owned Enterprises; payment of claims transferred under the Law to the Asset Management Agency of the Republic of Macedonia (functions of the Asset Management Agency were transferred to the Ministry of Finance); buying state property offered for sale and envisaging a possibility to be bought with bonds; buying shares and stocks of state-owned capital in the privatization process; payment of concession fee for state property; buying or payment of lease of state property; payment of liabilities under the Law on Issuance of Denationalization Bonds of the Republic of Macedonia and other ownership equivalent set under the Law.

Average trading price of denationalization bonds from the seventh issue on the Macedonian Stock Exchange AD was 80.22 in August. If average trading price of

*Ministry of Finance of the Republic of Macedonia
Public Debt Management Department*

denationalization bonds from the seventh issue and the denationalization bonds from the sixth issue in the initial period is compared, one can conclude that average trading price of denationalization bonds from the seventh issue was higher by 4.22 percentage points.

1.3 Trends on the secondary market for government securities in the Republic of Macedonia

During July-August 2008, there was insignificant trading in government securities (treasury bills and government bonds) on the OTC market, i.e. there was only one transaction with treasury bills in the analyzed period. Total nominal trading amount was Denar 3.5 million, with average price of 98.4413 and average yield to maturity of 7.60%.

On the Macedonian stock exchange, structural bonds were traded in July, in the total volume of EUR 663.58 thousand and total trading volume² in structural bonds was EUR 577.77 thousand or Denar 35.35 million. Average yield to maturity reached the level of 6.83%.

Total trading volume for structural bonds in August was EUR 527.50 thousand and total trading volume for structural bonds was EUR 456.59 thousand or Denar 27.93 million. Average yield to maturity reached 6.91%.

In August, trading volume with structural bonds dropped by EUR 136.1 thousand compared to the one in July, and the turnover from trading with structural bonds was by EUR 121.18 thousand lower in relation to the previous month. Average yield to maturity in August was by 0.08 percentage points higher compared to the one in July. Share of foreign investors on the Macedonian stock exchange regarding government bonds (continuous and structural) in August was 7.35%, being a decline by 0.62 percentage points compared to the share of foreign investors in July, when it was 7.97%.

1.4 Review of ownership structure of undue structural government bonds regarding old foreign exchange saving and denationalisation as of August 2008, inclusive

As of August 2008 inclusive, overall stock of undue structural government bonds was EUR 291.41 million, EUR 125.64 million out of which referred to structural government bonds for denationalization (seven issues of denationalization government bonds), while EUR 165.77 million referred to structural government bonds for the old foreign exchange saving. Total number of holders of undue structural government bonds was 129,117, 7,034 out of which were holders of denationalization bonds, while 122,083

²Total trading volume obtained by multiplying the achieved price and the volume nominal amount of the security.

*Ministry of Finance of the Republic of Macedonia
Public Debt Management Department*

were holders of bonds for the old foreign exchange saving. Out of the total amount of EUR 291.41 million, EUR 196,83 million were owned by physical persons, and EUR 94.54 million were owned by legal entities. Out of the total amount owned by legal entities, EUR 28.48 million or 30.13 % were owned by banks, EUR 1.22 million or 1.30% were owned by brokerage houses and the remaining ERU 64.84 million or 68.58% were owned by other legal entities.

Ratio on the ownership structure of undue structural government bonds ay physical persons and legal entities in August, compared to July, showed increase in the share of legal entities by 5.53 percentage points compared to the share of physical persons, which dropped by the same percentage points.

Average time to maturity-ATM* of continuous government securities

*Average time to maturity (ATM) is an indicator showing the refinancing risk, which is especially relevant when the debt should be refinanced by additional issuance of new public debt. ATM shows the average length of time until maturity of securities and the sensitivity of fixed-income funds to the interest rate variations. The longer the period of time of ATM, the greater the sensitivity to the interest rate variations.

	Treasury bills		Government bonds				Total	
			2 years		3 years			
Duration*	30th of June 2008	31th of August 2008	30th of June 2008	31th of August 2008	30th of June 2008	31th of August 2008	30th of June 2008	31th of August 2008
Average days	57.37	67.22	359.84	311.77	581.06	518.97	201.74	191.40
Average years	0.16	0.18	0.99	0.85	1.59	1.42	0.55	0.52

*Duration is an indicator showing the risk of interest rate variations. More precisely, this indicator shows how soon the interest rate changes would affect the debt-related cost, i.e. what is the change in the value of the fixed-income securities resulting from 1% variation in interest rates. When expressed in years, 5-year duration means that the value of the securities would grow by 5% should the interest rates decline by 1% and vice-versa.
